 karen-perarnau

## Summary

Full Stack Developer with experience in freelance projects using React, Next.js, Node.js, and PostgreSQL. I have contributed to the full development cycle of web applications, from interface design to API implementation and database management. I'm looking to join a collaborative team where I can contribute my skills and support the success of ongoing and future projects.

## Experience

### Interaxo Startup

July 2025 – October 2025

Frontend Developer - Freelance

🔗 <https://examples.interaxo.io/pong/server>

- Developed an interactive Pong-style multiplayer demo using Next.js, TypeScript, and the Interaxo SDK.
- Implemented real-time functionalities for product demonstration.

### Pelom Startup

April 2024 – January 2025

Full Stack Developer - Freelance

🔗 <https://www.pelom.co>

- Built reusable components with Next.js, React, and TypeScript, and responsive interfaces using Material UI.
- Created RESTful APIs with Node.js and Express, and managed PostgreSQL databases with TypeORM.
- Improved application performance, implemented tests using Jest, and collaborated using Scrum methodology.

## Personal Projects

### Ara Social Media

2023

🔗 <https://araa.vercel.app/>

- Social media application developed with React, Node.js, and PostgreSQL.
- User authentication system, post feed, and responsive UI.
